Spanish
- *Native or Bilingual Proficiency*

English
- *Full Professional Proficiency*

INTERESTS

- Reading
- Chess
- Videogames
- Cyber security

ABOUT ME

I am a full stack developer specialized in Javascript, highly logical and analytical problem solver and immensely curious fast learner.

ACADEMIC EXPERIENCE

FULL STACK DEVELOPER
AltaBirra | July 2021

Ecommerce developed in a team environment with Typescript, using React for the frontend, Node for backend and Prisma to manage the PostgreSQL database. The app allows users to register and login (with Google and Facebook), become sellers by uploading their beer, buy someone else's beer using Mercadopago as the payment option, add posts to favorites and to cart where multiple beers can be bought in one payment.

FULL STACK DEVELOPER
Funtivity | June 2021

Creation of a database with PostgreSQL and its models with Sequelize. Using the Rest Countries API the database was filled with countries, so that the backend developed using Node.js and Express.js could provide the user with the information requested through the React.js and Redux frontend. The app also allows the user to create activities that can be asigned to a country and seen in it's detail.

FRONTEND DEVELOPER
MoviesApp | May 2021

React and Redux frontend app that lets the user search for movies by name, returning mutiple results from which they can select and add to favorites aswell as look at the detailed information provided by the OMDb API. The user also has access to a favorites tab from where they can access the detail information and unfavorite the movies they want.

EDUCATION

FULL STACK WEB DEVELOPMENT BOOTCAMP
SoyHenry | April 2021 - July 2021

Modules:
- *Javascript and data structures*
- *Frontend development with React.js*
- *Backend development with Node.js*
- *Databases*

INFORMATION SYSTEMS ENGINEERING
Universidad Tecnológica Nacional

Second year completed
